Presentation Synopsis: In November 2022, the Provincial Archives “soft launched” Access to Memory (AtoM) its new collections management database. AtoM was developed by Artefactual Systems Inc in Vancouver, BC. AtoM is a web-based, open-source application for standards-based archival description and access that had been on PAA’s radar since 2015. This presentation will provide a brief overview of the PAA’s AtoM journey to date as well as plans for the future and will also include a brief demonstration of AtoM.

Presenter: Wayne Murdoch, Director, Collections Management Section
